

**SDI Review Form 1.6**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	2014_PSIJ_14151
Title of the Manuscript:	Determination of Optical Band Gap energy of wurtzite ZnO:Ce Nanocrystallites
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>1. The structure of the article is poor.</p> <p>2. The summary should only present the experimental results and not conclusions and experimental.</p> <p>3. Five key words should be enough.</p> <p>4. The authors show changes in the ZnO-Ce doped samples.</p> <p>However changes were observed in such case for the effect of heat treatment temperature and not by the incorporation of CeO<sub>2</sub> in the crystal lattice of ZnO.</p> <p>5. Insert any of the XRD patterns corresponding to the undoped sample to compare with the doped samples.</p> <p>6. Make a table with the results of analysis of the atomic composition of the percentages of Zn, O</p>	<p>1. Modified</p> <p>2.modified</p> <p>Five key words are included</p> <p>Changes were found in FTIR,EDAX, XRD and in band gap energy</p> <p>Presented the XRD of Undoped ZnO</p> <p>Presented</p>

**SDI Review Form 1.6**

	<p>and Ce respectively.</p> <p>6. Make a plot <math>(\alpha h\nu)^2</math> vs, <math>h\nu</math> considering that transition in this material is direct and likewise to obtain the band gap energy (<math>E_g</math>) according to this model.</p>	We will present it in the next assignment
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
