

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2013_PSIJ_7803
Title of the Manuscript:	Crystal and molecular structure of Di ((E)-2-(pyridine-2-ylmethylene)hydrazinecarboxamide)cobalt(II) dichloride triaqua
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The paper only covers on the x-ray crystal structure of the cobalt complex. No other studies are covered by the author which are deemed to be significant in order to be published in this journal. Some FTIR and/or UV-Vis data should also be included in order to study further the behaviour of the complex. In addition, some physical properties, for instance thermal stability can also be covered.</p> <p>The introduction of the study should be well presented especially in term of previous structural studies of the complex. Such write up would help to show that the prepared complex is indeed new and has not been characterised.</p> <p>If the author insists on remaining the paper as it is, it should be more suitable to send the paper to be published in Acta Crystallographica publication, which solely covered the crystal structure of the complex.</p>	Elemental analysis, IR and antimicrobial studies are included.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
