

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2014_PSIJ_9604
Title of the Manuscript:	Distributions of electron density and electron temperature in magnetized DC discharge
Type of the Article	Basic experimental plasma characterisation

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The proposed topic is very interesting for low pressure plasmas research. However, the presented manuscript is just a draft and cannot be approved in the present form. I strongly suggest that the manuscript be proofread more carefully for grammar and notation mistakes. Give details (and data) of equ. 1 - 4.	1- Corrected The equation are basic and famous equation in plasma physics to determine the electron and density of electron moreover I add some references
<u>Minor</u> REVISION comments	Check the figures for uniform notation of axis titles and units and provide better quality (use Origin software).	Corrected
<u>Optional/General</u> comments	Use one type theme fonts (times new roman) and Equation or Math type to write both the text and equations. Give calculations details for eq. 1 -4.	Corrected
