

SDI FINAL EVALUATION FORM 1.1

PART 1:

| | |
|--------------------------|---|
| Journal Name: | Physical Science International Journal |
| Manuscript Number: | 2014_PSIJ_12624 |
| Title of the Manuscript: | Dry Sliding Wear Behaviour of Plasma Sprayed Fly Ash Added Red Mud Coatings |

PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|--|---|
| <p>1. "The porosity of 50%Red Mud+50Fly Ash coating in Table 4" was not added, this is very important.</p> <p>2. "The SEM images of coatings were not added", so, the analysis and conclusions are not convinced.</p> <p>3. The authors only give the correlate of plasma torch input power with wear rates. However, how do the microstructure and mechanical properties effect the wear rates are not illustrated in detail because the microstructure and mechanical properties have very important influence on the dry sliding wear behaviour of the coatings.</p> <p>Suggestion: More test samples are added to analyze the results of the paper.</p> | <p>A suitable change has been done.</p> |
