**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The author has answered the observation I raised in the previous report.</p> <p>The author strongly improved the manuscript and it is suitable for publication.</p> <p>However, before publishing it, it is necessary revision from typesetting mistakes.</p> <p>For instance, in abstract electrospinningfacility.</p> <p>PbTe power : I think it is “powder” not “power”</p> <p>6ohm*m,is</p> <p>And so on.</p>	<p>In the abstract, the space missing in “electrospinning facility” is added.</p> <p>The expression “PbTe power” is corrected as “PbTe powder” in the final version.</p> <p>The missing space problem in “6ohm*m,is” has been corrected.</p>
