Subject: RE: Request for Editorial decision for manuscript number 2014_PSIJ_12318

After having read the MS and the comments, I agree with the referee that published results must be able to be replicated by other researchers. I thus ask the authors to (i) summarize the needed important results in the present publication or (ii) resubmit later this paper when a reference on the needed results is known. In case the authors choose point (i), the corrected manuscript will have to be sent again to the referee for advice.
