Subject: Re: Request for final decision for manuscript number 2014_PSIJ_9605

Based on the reviewers' comments and the revised content, this manuscript is acceptable after comply with the following suggestions:

- (1) Include an experimental setup in section 2, which may help reader to understand the problem without going to read authors' previous study.
- (2) Rewrite section 3.1 and provide more information from previous study. There still exists some typing errors such as at its center (the center of the hollow magnets also).moreover B is maximum at Check it.
- (3) There is no need to use subsection "3.2.2-a" and "3.2.2-b", just write the two methods as (a) ... and (b) ...
- (4) The format of equations is substandard. Try to revise them with the same font and size.
- (5) The quality of figures is substandard. Try to revise them using a standard way, e.g. put the X.Y titles in the more suitable places.
