**(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)**

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

## SDI Review Form 1.6

### **PART 2:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<ol style="list-style-type: none"> <li>1. The title is too general and somehow confusing.</li> <li>2. The abstract and the introduction sections are too shallow, the author is asked to rewrite them in a manner that reflect the strength of manuscript.</li> <li>3. The authors should write about Coriolis force and demonstrate it in details because it is not clear for ordinary reader.</li> <li>4. The authors should mention more references about the Coriolis force.</li> </ol>	

SDI Review Form 1.6

	<p>5. The authors should be read much before writing any paper, because there are many errors in rules of writing, for example, the authors did not leave a space between any symbols and the next word (<b>see highlights in the manuscript</b>).</p> <p>1. How does author justify this model of plasma?, Also, the author should apply their results to an application by choosing the appropriate plasma parameters</p> <p>6. Finally, the overall English language of the current manuscript should be improved.</p> <p>I would be happy to recommend publication of this manuscript after making these revisions.</p>
