

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2014_PSIJ_10312
Title of the Manuscript:	On the Problem of Reduction of the State's Vector
Type of the Article	<u>Original Research Article</u>

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	It is necessary to show the relation of the approach under discussion to other approaches to this problem, which can be found in modern references. It is well-known that the reduction of the state's vector is a general task of quantum mechanics, and thought experiment with screen and spot is used traditionally. Besides, it is desirable to extend the Section 5 of the paper for more detailed discussion of results.	
<u>Minor</u> REVISION comments	The References are to be extended. The statement of a problem must be improved.	
<u>Optional/General</u> comments	Unfortunately, the paper looks like as a description of a particular case without generality. It seems to me that the text of the paper is far from to be clear.
