

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	2014_PSIJ_13453
Title of the Manuscript:	Nano-structural characterizations: Elongation of graphene layers within solid hydrocarbons
Type of the Article	Original research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
All authors' responses are accepted except for the one for Section 4.2. Despite that all functional groups are labelled accordingly, the band =C-H is still impossible to be observed from all spectra as there are no obvious peak corresponding to 3020 cm ⁻¹ . I doubt the validity of the Mid-IR spectra. Please convince me with more evidence.
