

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2015_PSIJ_17212
Title of the Manuscript:	Performance Evaluation of FSO System with MIMO Technique in Different Operating Environments
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<ol style="list-style-type: none"> 1. Introduction is too long, some of it can be deleted 2. Equations 1-6 the references must be given 3. Figures 4 and 5 are they taken from references, if yes, give the reference 	<p>1-The introduction is reformatted in the revised version</p> <p>2-The references of the indicated equations are included in the new version of the paper.</p> <p>3-The indicated figures are the plots of our simulation results.</p>
<u>Minor</u> REVISION comments	<ol style="list-style-type: none"> 1. All MIMO words must be corrected, for example 2 MIMO be 2x2 MIMO, and soon 2. Explain "Haze and Light Fog" condition 3. Figures 8, 9 and 11 they seem same and very slight difference 	<p>1-The size of the MIMO system is reformatted according to your suggestion.</p> <p>2-This condition of operation is explained throughout the literature.</p> <p>3-This indicates that the behaviour of FSO system in these operating environments is approximately the same within a slight difference.</p>
<u>Optional/General</u> comments
