Type of Article	Case Study

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The revision was good but I still STRONGLY advise the authors to review the aforementioned figures for simplicity; as the published work is not for the authors consumption but for the public. The figures only need to show the major reservoirs discussed in the paper and not the whole well log section.</p> <p>Moreover if the authors claim the introduction is reduced then it means more work was done during the literature review than at the post write-up of the project itself</p>	<p>THE FIGURES HAVE BEEN WORKED ON AS THE REVIEWER ADVISED FIG.5 TO FIG.10 HAS BEEN WORKED ON AND REPLACED WITH THE CORRECTED VERSION</p>
