Type of Article	Case Study

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
No substantial changes have been made in the manuscript. The figures continue to be of poor quality. Almost all of them needs redrafting. In many, the units of horizontal and vertical axes are illegible. The discussion part of the text describing structural features (illustrated in Figures 11, 12, 13) is highly speculative and unsubstantiated. This is also true of the part of the manuscript describing RMS amplitude maps, in Figures 14, 15 and 16.	WE HAD TO GO BACK TO THE WORK STATION TO WORK ON THE FIGURES FIG.5 TO FIG.10 HAS BEEN WORKED ON AND REPLACED WITH THE CORRECTED VERSION ON THE FIGURES. THERE ARE NO SPECULATIONS HERE WE PRESENTED WHAT WE OBSERVED.
