

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2015_PSIJ_17444
Title of the Manuscript:	Combined use of different geoelectrical arrays for hydrogeophysical characterization of a Crystalline Basement Complex environment
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	None	
<u>Minor</u> REVISION comments	<p>1). Some of the areas requiring review (e.g. of grammar , format , etc. are highlighted in yellow and red)</p> <p>2). The labelling of the pseudo-sections are illegible (fig. 6).</p> <p>3). VES 12, 14-15 not depicted</p> <p>4). The use of the word 'precisely' in its context (page 15) seems beyond the ambit of authors who are subject to review.</p> <p>5). Do results of previous researchers, and borehole exploration within the campus validate your claims about plausible depth to aquifer?</p> <p>6). A table juxtaposing the critical finds of the applied arrays may add value to this work.</p> <p>7) Conclusion should summarise research based on hard facts. Currently, it seems evasive</p> <p>8) The approach in this work is not novel. Therefore, the use of the words 'established new approach' in the Abstract should be expunged. Furthermore, the statement that 'Theareaiscutinvariousplacesbyquartzofeldsparthicveinsandbandswhichgivethemtheirfoliation' seems technically untenable.</p>	Changes incorporated
<u>Optional/General</u> comments	A beautiful piece. Publishable upon review
