

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2015_PSIJ_18291
Title of the Manuscript:	ELECTRO-GRAVITY VIA GEOMETRIC CHRONON FIELD
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Define “force fields” as used in this paper. For authenticity, replace “Einstein” by “Grossmann-Einstein” (7 occurrences) and in §6. “Hilbert-Einstein” by “Hilbert”; Plagiarism Issue : This paper appears to be a follow-up to the paper published last year on the same subject. No plagiarism if same author.	Instead of force field. The used should be of an acceleration field. This was added to the introduction. An ordinary force field is expressible in terms of a derivative of momentum. This seems wrong to me and also to Dr. Tzvi Scarr and to Dr. Yaakov Friedman. This paper is a very advanced follow up that includes, symmetries in the acceleration field. These symmetries in the author's opinion are the key to develop a connection to QFT. It is an arrow for researchers that choose to follow the offered path. These symmetries and the new interpretation of what electric charge is, constitute new important findings. The other remarks were implemented.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Shorten some of the math—e.g. Equations (27) (28) (41) (49) and the like.
