

**SDI Review Form 1.6**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	2014_PSIJ_15551
Title of the Manuscript:	Microcontroller based intruder lighting system (MBILS)
Type of the Article	Method Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The design of a MBILS device is studied in the present paper. The different modules are detailed with interesting technical analysis. However, the text needs significant improvements and the discussion is too evasive.</p> <ol style="list-style-type: none"><li>1) I have put many corrections in red within the text in the scanned document <i>PSIJ_15551-CORRECTIONS.pdf</i>. Please correct and check very carefully the entire manuscript. Sentences have to be written in correct English. Do not mix American and British English: use one or the other.</li><li>2) Figures and equations have to be clearly depicted. Captions have to be put for each figure. Intermediate calculations shouldn't appear. References have to be written taking more care.</li><li>3) In the design analysis section (line 184), the power supply module and the camera module are not detailed.</li><li>4) The discussion part is too succinct. The authors must comment on the tests which were carried out.</li></ol>	

**SDI Review Form 1.6**

<b><u>Minor</u></b> REVISION comments	<p>1) The title seems very general. It could be replaced by "Design of a microcontroller based intruder lighting system".</p> <p>2) Line 20: Authors say that there are various studies on intruder systems. They should quote a few references.</p>	
<b><u>Optional/General</u></b> comments
